CONFERENCE INFORMATION

The Global Circle for Scientific, Technological and Management Research (GCSTMR) has launched the 1st International Conference on Sustainability in Natural and Built Environment (iCSNBE-2019) in Dhaka, the capital city of Bangladesh, to be held 19-22 January 2019.

As the life style of the human on the planet is changing at the highest rate bringing climate change, resource stress and life-style gap globally, sustainability is becoming a growing concern. In every sector of human activities, in natural and built environment, a strong focus is immensely required to develop systems that will sustain the life on this planet as comfortable as and as long as the planet can support.

The iCSNBE-2019 Dhaka is aimed to provide an opportunity for international leading experts, professionals, academics, researchers, policy makers, government, politicians and students to get together and collectively explore current practices and showcase future trends on how the world can become more sustainable.

The iCSNBE-2019 Conference will specially focus on many areas covering both natural and built environments, e.g. energy technologies, use of construction material, use of water and waste, life cycle, climate and resource impact assessment of technologies, and many exigent issues evolving around climate change and arising from development and human living instruments.

The iCSNBE-2019 Conference is supported by GCSTMR as its 4th World Congress. GCSTMR endeavours to create a platform for young researchers to exchange ideas and share information with experts in their respective fields. GCSTMR encourages and facilitates trans-national collaborations among its members and associates in research, training and professional activities. Multidisciplinary international conference series run by GCSTMR could open vast opportunities for researchers enabling them to interact on the global platform as well as to seize the advantage of knowledge sharing in the digital arena.

The 4th GCSTMR Congress is jointly organized by GCSTMR, Bangladesh Open University (BOU), Daffodil International University, Islamic University of Technology (IUT), Dhaka University of Engineering and Technology (DUET) and Business Faculty of the Dhaka University (DU). The conference venue is 20 km away from the airport and many international standard hotels, motels, guest houses and resorts are situated in and around the venue.

Bangladesh, an emerging economic power in Asia, is also popular for its two main tourist attractions: Cox's Bazar, is a contender for the title of longest unbroken sandy sea beach in the world and the Sundarbans, the largest mangrove forest of the world with the Royal Bengal Tiger and the Spotted Deer.
